## **PROJECT DETAILS**

Project # 1 : Eltorofashions (E-commerce Websites)

Project # 2 : Inddiagreenmart (E-commerce Websites)

Role: Software Engineer

Duration: Aug/2023 to Oct/2023

### **Description:**

- Our design process begins with a thorough understanding of Eltorofashions brand, target audience, and business objectives. We work closely with you to create a custom design that reflects your Eltorofashions identity while prioritizing functionality and user experience.

### **Key features of our design service include:**

- Responsive design: Ensuring Eltorofashions website looks and functions flawlessly across all devices and screen sizes.
- Customization: Tailoring the design to suit Eltorofashions unique business requirements and branding guidelines.
- Intuitive navigation: Creating a user-friendly browsing experience that encourages engagement and conversions.
- Optimized checkout process: Streamlining the checkout process to minimize cart abandonment and maximize sales.

### **Maintenance Services:**

- Regular updates: Keeping Eltorofashions website up-to-date with the OpenCart releases and security patches.
- Performance optimization: Monitoring and optimizing website performance to ensure fast load times and smooth functionality.
- Content updates: Adding new products, updating prices, and refreshing content to keep your website relevant and engaging.
- Security monitoring: Implementing robust security measures to protect your website from malware, hackers, and other security threats.

### **Responsibilities:**

- Development and implementation of core functionality.
- Understand the business and functional requirements.
- Analyzing and creating Proof of concept of customer requirement and changes.
- Iterative testing and code reviews through development of the application.
- Integration Testing.
- Integration Testing & debugging.

### **Environment :**

- Opencart
- PHP
